REDCLIFF

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

THIS DISTRICT WINS SOUTH AND REDOFF AHEAD IN DISTRICT

This Town Makes a Magnificent Showing by Subscribing \$132,950 to Victory Loan--Dominion Glass Company Employees Head List of Industries and Win Honor Flag--Pressed Brick Company and Ross Clay Products Company Also Win Industrial Honor Flags--The Prince of Wales' Flag and 24 Crests Won by the Town--Great Enthusiasm Displayed the Last Few Days of Campaign.

Excitement and enthusiasm ran high during the closing days of the Victory Loan campaign when it was learned that Redcliff was well in the running for the honor flag. Now the campaign is over and returns were in from all districts and sub districts, there is no doubt that Redcliff has won the much coveted prize and that the big captured field will be unsubscribed here in the near future.

In all Redcliff subscribed \$132,950 to the Victory Loan. The Prince of Wales flag was won early in the campaign and the "dominion glass company" made the piling up of additional crests, so that at the finish we had won in all 24 crests.

The winning of the gun comes in a rush about way. There was only one gun up for competition in this province. First of all it was decided whether it went to the western or southern Alberta. This depended on whether or not the north or south made the best showing over its allotment. In this the south won. Then it went to the best division in the south that made the best showing. In the Medicine Hat division won. Then it was to go to the city or village within the district which made the best showing, that is, won the most crests, and here's where Redcliff came in. With our 24 crests we had a big lead on Irvine with 14 crests, which was our next nearest competitor.

Behind winning the Prince of Wales flag, three industrial honor flags will come to Redcliff. These will come to the Dominion Glass Company, the Pressed Brick Company and the Ross Clay Products, and the glass plant has also won several crests to add to its flag.

There was great competition for the fifty dollar bond offered by Chas. L. Lyall to the canvassers. The money was used for the best showing over its objective allotted to the several districts and its industries. In this the town of Redcliff was neck and neck between the Glass plant canvassers and the school teachers who canvassed for business crests. When the canvassers had finished their task of adding the winners it was found that the Glass plant canvassers had won out by a small fraction.

The dividing of the town into districts was done by eleven canvassers for each of the industries and then leaving the residential or business crests to the school teachers. The teachers divided into sections among themselves. The following were the official canvassers: E. H. Wolff and Penny, Miss F. C. Glass plant; Rollie M. P. O. McLean and S. Kearney; Brick and Clay, P. Lewis and C. Bush; Pressed Brick, C. E. Oakland and H. J. Simpson; Ross Clay Products, Miss F. teachers.

The following business section, the following amounts were subscribed in the different districts:

Victory Loan officials at Calgary have sent word to the effect that the Medicine Hat district has won out in the district competition, and Mr. Wm. Cousineau, chairman of the Medicine Hat district, assures us that Redcliff easily won out on his district. We are informed, however, that before an official announcement is made all returns must be in file at the news office and the chairman of the various districts meet in Winnipeg to allot the guns to the various districts. We are informed that there is only one gun for each province and Redcliff wins the one for the whole of Alberta. With an old campaigner like the Bill Cousineau representing this district at the meeting of chairmen in Winnipeg we must assume that the gun will be in its right hands. Redcliff has won it in a humbly possible, and we may also be assured that no one will enter more heartily into our celebration when it does come, than the same Bill.

**\$673,159,790 Raised
In Victory Loan**

The grand total of the Victory Loan for the Dominion of Canada is \$74,159,790, made up as follows:

Quebec	\$121,102,200
British Columbia	\$50,000,000
Alberta	\$51,181,000
Saskatchewan	\$50,000,000
Manitoba	\$40,482,000
New Brunswick	\$14,700,000
New Scotia	\$20,000,000
Prince Edward Island	\$5,000,000
The city of Toronto total was \$149,379,500, and the city of Montreal \$125,102,200.	

Announcement of the Victory Loan returns for all sections of the Dominion was made at a gathering of almost 9,000 people in Massey hall, Toronto, last Monday, amid much enthusiasm. Sir Henry Drayton, Dominion minister of finance, was present and announced the final for the various provinces, the Dominion and Montreal.

"Every province in Canada has gone over its objective," Sir Henry Drayton stated, amidst great enthusiasm. "There was great Victory Loan workers everywhere in Canada," he said. "In the west they have their credit with the bank. The money is early winter, roads practically impassable and much grain unharvested, yet they have done splendidly."

The finance minister said people talked about Canada's big debt, but the debt was nothing compared with what had been done. People need have no fear of Canada's future, he said, and there was no occasion for pessimism.

MINORITIES IN SASK.
WILL NOT GO TO SCHOOL.
Former trouble is threatened by the minorities of the old colony in the movement in the vicinity of Swift Current. Recent reports indicate that once more it is quite clear that an organized system of passive resistance to the school attendance act has been established by the old colony. Minorities in the fifteen villages making up the district, and in the district, and even some of those who had previously decided to conform with the public school laws and save trouble, have been urged to join in the new movement in the old channel of resistance.

Former Redcliff Lady Weds in Havre

We clip the following from the Havre, Mont., Herald:

"Youth can be secretive when it chooses. This fact was demonstrated yesterday afternoon when Miss Margaret Duffield married George T. Mill, with not even the parents of the couple present to witness the ceremony. It was after the young couple had boarded the train and were on their way to Great Falls."

"Both of the young people are well known here, Miss Duffield having been employed by the Harns Co. Company, while Mr. Mill is affiliated with the Grogan-Robinson Lumber company, of this city."

"Fields of the couple have been informed of the coming marriage some time, but none were advised of the exact date and it was quite a surprise to the most of friends in the city."

North Ontario May Succeed From So. It

In Northern Ontario the question of succession of this part of the province from Southern Ontario is one of the chief topics of conversation. The movement has gained such proportions as to be impossible now to ignore. Rightly or wrongly the viability of such a step will probably be discussed at length and in finest detail by leaders of the north. To this end a conference of leaders has been planned for the second or third week in January. The present attitude as to appears to have been born of the belief, long standing, that the mining and lumbering districts have not received due recognition. Premier E. C. Dwyer, in introducing H. Mills, former locomotive engineer, to administer the department of mines, has, it is said, added fuel to the fire of discussion.

Toronto Paper gets After Crerar

The Mail and Empire editorially replies to the statements of Hon. T. A. Crerar at Brandon on "protection," the editorial says:

"Mr. Crerar says that in Ontario the direct agricultural province of Canada, protection has driven people on to the land into the cities. There was a protection that drove the hundreds of thousands every year out of the United Kingdom to find work and opportunity in countries that have protection?"

"Was it protection that drove young farmers from Ontario to settle the west, where Mr. Crerar himself is flourishing?"

"Public men who make speeches are expected to satisfy the intelligence of their hearers. Anybody can say that protection is a curse, but it is another thing to establish the proposition. Mr. Crerar is a strong advocate of free trade, and therefore has no use for protection."

"A public man ought to feel bound to give convincing evidence in support of each strong statement. There was no protection in England to account for the flight of population from the rural districts to the towns, as Crerar is pronounced as ever it was here. The movement of people from Ontario farms to farms in the west was as decided in its time as ever over the movement from Ontario farms to Ontario towns. How could the one be attributed to protection and the other not, his tariff being fairly constant."

THANKS TO VICTORY LOAN CANVASSERS AND THE CITIZENS

The great success of the Victory Loan campaign in our town Redcliff was largely due to the untiring and energetic efforts of the canvassers, and we as citizens of the town executed to let the occasion pass without publicly thanking our thanks to all the canvassers for the excellent services rendered, as a result of which great distinction has been brought to the town.

The friendly rivalry which existed between them and the many demonstrations of co-operation and helpful suggestions among the several team canvassers, made the work of the most pleasant and harmonious character for all concerned.

We also wish to thank the citizens generally for the cheerful manner in which they received the canvassers and for the liberal way in which they responded to the call.

Signed
GEO. LYDIAIT, chairman,
E. L. STONE, Secretary.

Find Body of Man Near Bowell

The body of a dead man was found along the C. P. R. track near Bowell by train men this morning. Coroner Boyd and provincial police went out to the scene to investigate and found the body badly mutilated. It is presumed the man had been struck by a passing train during the night.

The body was the deceased man's name was Gustav Wendland, an old name was written on the cover of a small book found in his pocket. The remains are now lying at Yocum's undertaking parlors--Medicine Hat News.

France Wants Canada To Build Ships

Canada ship yards may have an opportunity to build ships for the French government, according to reports in circulation. France is anxious to be supplied to buy her own ships, to operate on the Mediterranean and to build up her commercial fleet. It is estimated that the French government would be asked to spend \$100,000,000 to build ships for the French government. It is said that the number of ships to be built is to be as much as \$170 a ton for them. It would be glad, if possible to place the order in Canada. Some time ago Hon. C. B. Ballantyne was reported to have led a deputation calling on him that Canada could dispose of all the ships built under the government construction program at satisfactory prices. It is now supposed that France would be glad to buy the ships.

Canada Importing Quantities of Whiskey

A news report from London, England, says: "There has been an astonishing rush for whiskey both by traders and private customers as the government of the withdrawal by the government of restrictions on distribution."

The news was brought into the question by the managing director of a well known firm of distillers who said that it was remarkable that, though Canada had largely gone dry, his firm was shipping more spirits there than in wet times, and recently Canadian agents had requested that shippers be substituted for corks as corkers were no longer difficult to obtain.

It is believed in Italy that the government has succeeded in solving the flu problem, with the assistance of the allied and neutral war workers going out as household helps.

May Mean Another Industry in Redcliff

E. McKeller, of the Swift Current district, is in town this week making arrangements for the manufacturing of his patented device which solves the problem of starting the kitchen range in the morning. This patent is called the "Fire Lighter." It is made from a special quality of clay or which there is an unlimited supply on Mr. McKeller's farm. This clay is made into a brick to which is attached a metal handle. The brick is dipped into kerosene and, when ignited, retains a heat long enough to start a coal fire. As it burns for half an hour and throws off an intense heat, the heater can also be used to boil water in hot weather or in case of emergency during the night.

Since coming to Redcliff Mr. McKeller has made arrangements with the Brick & Clay Co. here to experiment with the raw material which he has here secured here. These experiments are being made today and if they turn out successfully arrangements will be made to have the material shipped here in car loads to be manufactured into the finished article.

U.S. Rejects Treaty In All its Forms

The fate of the treaty of peace with Germany and the League of Nations, as the United States is concerned, and as the basis of President Wilson's famous yesterday and last night's all efforts to have the treaty ratified in some form by the senate has been discussed just here, where it was submitted to the upper house of congress, and, technically, peace is no nearer than it was on Armistice Day more than a year ago.

With much debate and much technical discussion thrust back upon him, the next move is up to the president, and there was no indication whether he would pursue. In any event, it was not believed there would be any developments until congress convenes on December 1st in regular session. Opinion as to what may be expected then is divided.

Senator Lodge, majority leader, who led the forces opposed to adoption of the treaty as presented, declared the failure of ratification last night the pact, unless President Wilson thought to withdraw the pact, by withdrawing it and then submitting it at the new session next month.

Senator Lodge, however, has stated that the president during the recess might as it feel out the other powers as to their attitude on re-ratification with a view of bringing the treaty to some sort of ratification at the December session. If re-ratified, the treaty would come before the senate practically as new business, and debate on it would not be governed by the closure rules involved in the withdrawal of the session just a year ago.

After three ineffectual attempts to ratify the peace treaty, the senate gave up the attempt and laid the treaty aside. All compromise efforts to bring ratification failed, the three ratification bills all going down by overwhelming majorities.

Box Springs Resident Passes Away Suddenly

On Wednesday afternoon of last week a very sad death took place in the Medicine Hat hospital when Mrs. E. J. Lewis, of the withdrawal by the government of restrictions on distribution, passed suddenly away while undergoing an operation. Deceased was a young woman in the prime of life and prior to entering the hospital had taken a keen interest in the upbringing of her family and the welfare of her home and surroundings.

The funeral services, which were conducted by Dr. Simpson, of Redcliff, took place in Knox's undertaker's parlour, Medicine Hat, on Thursday afternoon. The remains were taken to deceased's old home in the United States for interment. Deceased leaves a husband and three children, the loss of a devoted wife and loving mother.

ADDITION TO GLASS PLANT PROGRESSING

When Completed Addition Will Be Larger Than Original Plant—Will Be Equipped With Modern Machinery—Lehr Will Be Largest in the World.

As a result of the fine weather of the past week activities, in connection with the building of the addition to the Dominion Glass plant have been resumed on a large scale.

Experts for the erection of the steel work have arrived and although they have started operations this morning they say that their work will under way and have a considerable portion of the steel roof now in place. Bricklayers have also resumed work and new have the main walls well up on all sides. With a week in the start of the winter for another few weeks it is expected that the whole of the new addition will be under way and that the factory work can be proceeded with regardless of the weather.

Considerable changes have been made in the plans of this addition since notice of it was first given in the Review, not now it is a fact that this addition is, in reality, to be built on the original plant. When completed this plant will be one of the most modern and largest in the world on this continent, and the last in connection with the new part will be the largest in any glass plant in the world. This job will be 15,500 feet. The present record is held in Japan where there is a job 12 feet wide.

League to go Ahead Without United States

Commenting upon reservations to the Versailles treaty by the United States senate and President Wilson's threat to withdraw the pact, the Chronicle which is supported continues to reflect the view of friends of the League of Nations.

"Unless the league is to fall into other, rather nations must go ahead for some years without America's participation, and we hope they will promptly decide to do so."

"Great Britain and France have been very anxious not to hurt American susceptibilities and as there is no consideration for the rumor suggesting they have addressed representations to Washington regarding re-ratification, the newspaper continues. 'In justice to our own people, we must, however, we can see day in getting to work with the league.' No comment is printed by other newspapers, but they do say that the league has a prominent place in their news columns."

RESULT GRATIFYING.

Citizens of Redcliff and district have reasons to feel justly proud of the excellent showing made in the Victory Loan campaign which closed last Saturday night.

The winning of the Prince of Wales flag and with it twenty-four crests besides the winning of three industrial honor flags, is a record which few, if any, towns the size of Redcliff in the whole Dominion can boast of. Then on top of all this there is the additional distinction of being the one town in the whole province to win the big German flag gun which was put up for competition at the beginning of the campaign.

Although Redcliff itself made a wonderful record we do not claim all the credit for winning the gun. In this connection great praise is due to the city of Medicine Hat and the town of Irwin, both of which places are in this district, and both of which contributed largely in bringing the gun to this district in the first place. The Review congratulates both these centres on the excellent showing they made, and as representing the citizens of Redcliff and the Victory Loan officers we would extend thanks to both these places for their valuable assistance in helping to bring such distinction to this town.

Through the campaign there was a keen rivalry between Medicine Hat, Irvine and Redcliff, but it was of the most friendly nature so far as the Victory Loan officials were concerned and it was the source of a great satisfaction when at the close of the campaign, Mr. Davies, chairman of the Medicine Hat executive, and Mr. Cousins, chairman of the district, extended congratulations to the local committee with the words: "We take off our hats to Redcliff, and will come up and help you celebrate." That is the spirit which should characterize all friendly competitions and it is the exemplification of that spirit that makes life worth living.

So far as Redcliff itself is concerned, a glance over the figures will show a wonderfully pleasing record in all we aspired to. \$152,300.00. Figuring our population at 2,000 this means that we subscribed \$66.47 for every man, woman and child in town. Figuring that we have four hundred homes in town it means we subscribed \$332.37 for every home in town. In all there were 386 bonds bought in town. This means a bond for every 5.1 of our population and an average of a little over \$344.00 for every bondholder.

On the whole the result is very gratifying and the record made in Redcliff will not be beaten in very many places in the whole Dominion.

Nova Scotia coal miners threaten to strike and move to Alberta. Just as if we hadn't enough trouble here now.

MAKE HASTE SLOWLY.

Advancements in labor circles during the past few years have been such that labor as a whole at the present time is enjoying greater knowledge than ever before in its history. In fact the common expression now is that "Labor is getting its bearings." Whether or not labor will be able to take advantage now of this much desired circumstance and continue to take advantage of it and improve step by step, depends upon labor itself and its leaders.

Good wages will be due in future as they have in the past to good organization. There is no organization without keeping faith, sticking to the organization, living up to agreements, and following leaders properly chosen.

Workers fight their future, fight themselves and the national prosperity when they ignore laws that they themselves have made for the government of unions, and substitute anarchy for organization in their dealings with others.

At the present time money is plentiful, work is plentiful, wages are good and will be better if only time is given for adjustment. But at this time when there is a demand in Europe for the products of this country, the demand of some branches of labor to cut down the working hours and increase wages to correspond with the cost is like killing the hen that laid the golden egg.

What would workers say if they heard that farmers were to work only four, three or two hours a day? They would say: "If the farmers do that, food will cost so much that we shall starve."

Every workman knows that the price of food depends on the amount of food produced by the farmers, which price is really the price of the labor that extracts food from the soil.

What is true of farmers is true of all others.

One workman gets what another man produces. If a man cuts down what he produces below reasonable limits, he cuts down what the other man can get.

If a man demands what is impossible he will not get it. He may persuade somebody to attempt the impossible but it will only be an attempt.

Workmen should have good pay, as good as the nations prosperity can make it. They should have hours as short as the hours can be in justice to the country and the work that it needs.

Labor, like everything else, must go up and down one or two steps at a time. To take an end flight at one step is preposterous and impossible. But to fall down a whole flight is not difficult at all. Some of those low misers are destined to realize that.

The best times that labor has ever known are here. If the workmen will allow it. The worst times that they have ever known are ahead if they insist upon having those worst times.

The whole thinking world is with the working man today and never before was the feeling that "the labor is worthy of his pay" stronger than it is today. But unreasonable demands upon the part of labor will soon change his sentiment.

Redcliff won so many crests in the Victory Loan drive that the flag was early in the drive will not hold them. It has been suggested that the Prince be requested to send along another flag.

School teachers all over the west are now thoroughly organized and are making requests to their respective school boards for the adoption of the salary schedules. This movement has been under way for some time and now appears to have reached the point where some definite action must be taken. Since all other classes of trade and profession are organized and demanding salaries and fees in keeping with the growing increases in the cost of living, it is only natural that such an important branch of public service as the teaching profession should fall in line.

And since other organized branches are meeting with such success it is also only natural that they will lend their support and encouragement to the teachers in their demands.

It is now only a little over a week till nomination day for the several vacancies on the council and school board. So far there is little talk of any new blood being brought out for either bodies and it looks as though all the retiring officials will be returned by a landslide.

The farmers government is now in control in Ontario. As yet the old province is still on the map, nor have any very wonderful changes taken place as yet. No doubt pessimists and optimists alike will be greatly

disappointed if something extraordinary doesn't happen pretty soon.

Farmers of the 3-man district are now organizing for a system of irrigation for the district. This matter should be kept well to the front by the farmers of this district. Otherwise we may soon be outlandized by the surrounding districts.

Wow! Listen to this young fellow. The other day a young lady was asked why she wasn't at the dance. "Why?" she said with some feeling, "Sim-

ply because I never was asked. The boys have danced with the girls all night and sometimes two three times, but they never take them to a dance." Buck-up boys.

HELD UP TRAIN TO VACCINATE PASSENGERS.

Passengers on the Central Ontario train, running from North Hastings to Toronto, 181, a novel experience when it was discovered that there were two men among them believed to be suffering from smallpox. The train was held up on its way south, the men segregated and the rest of the passengers submitted to vaccination against the disease by a phys. clin. who was called in for the purpose.

TORONTO OPPOSED TO COMPULSORY VACCINATION.

Compulsory vaccination was vigorously denounced at an independent meeting in Massey hall, Toronto, which was attended by some twelve or fifteen hundred citizens. The meeting passed a resolution favoring the appointment of a special committee to draft a report on to be presented to the Ontario government asking for the cessation of compulsory vaccination.

The Canadian wheat board denied the current rumor that the board was likely to commandeer all the wheat of the four ton grade, as it was behind with the deliveries for European contract.

Embargo on Cattle Is Disappointing

Considerable disappointment is manifested around the office of the department of agriculture at Ottawa by the receipt of the news that the British board of agriculture has again refused to remove the embargo on the importation of Canadian store cattle into the British Isles. The feeling is aggravated somewhat by the fact that the board of agriculture has admitted officially for the first time that Canadian cattle are free from disease. For nearly a quarter of a century, admission of Canadian cattle has been turned down year after year, the excuse given being that disease exists in our herds. As a matter of fact there has been no trace of disease among Canadian cattle for many years, and the real reason for the refusal has been the objections raised by the old country graziers to the competition of Canadian cattle exporters. They have been thus enjoying a form of protection which they were loath to relinquish, something which was of value to them but which was of no value to the cattle objects to less than to the totally unwarranted imposition of disease cast on the Canadian herds.

Western Farmers Lose By Slow Delivery

James Stewart, chairman of the Canadian wheat board, gave out the following statement: "The fact that the railways in the west this year, with a crop season commencing fully three weeks earlier than last year, have failed to meet the demand for grain to the east of the lakes in anything like a satisfactory manner in time for delivery to the seaboard by water, will mean an extra charge to the farmer, and to the country, of between three and four million dollars. This amount will be charged to the farmer in the extra cost of carrying stocks through the winter at country points, and of shipping all rail. Much wheat would have gone east by water had the railways been able to move it to the head of the lakes before the close of navigation. Indeed, it may be said that the failure of the railways in this respect has prevented the Canadian wheat board from disposing of a considerably larger proportion of the wheat crop of 1919 up to date than has been disposed of."

Free Seed For New Hullless Oat

The introduction of a good, new variety of hullless oats by the experimental farms branch has not perhaps attracted as much attention as it should. Free samples of this variety are now being distributed by the Dominion Cereals at Ottawa. The stock on hand is not large, but as long as the free samples will be gladly sent to farmers in almost any district of Canada, as it is believed that this oat will be widely useful. The full name of variety is Liberty, Ottawa 480. It is derived from a cross made in 1903 between the well known variety, Swedish Select, and a hullless oat from China.

Irrigation Live Issue In The South

The Calgary Herald says: "It comes storms throughout northern Alberta, with snowfall that covered up the scanty grass remaining after the drought, have driven home to the settlers of that area the necessity for irrigation. Interest in irrigation projects, according to F. H. Potter, Dominion commissioner for irrigation, is greater than ever and organization the southern part of the province is proceeding rapidly."

In the huge projected Lethbridge southeastern irrigation project, embracing 550,000 acres in round numbers, several different districts are being formed, according to the natural features of the lands, and portions are already in circulation to a number of them. This project is the one on which the two big natural reservoirs known as the Milk River reservoir and the Raymond reservoir form a part, and was inspected by Hon. Arthur Meighen, federal minister of the interior, and Hon. J. A. Cahoon, federal minister of immigration, on their recent trip to the west.

SOLDIER SETTLEMENT SUPERVISORS APPOINTED
District home supervisors for the soldier settlement board in the west have been appointed by the Civil Service Commission as follows: Miss R. C. McNamee, Edmonton, Alta.; Miss Elizabeth Crawford, Winnipeg; Mrs. Anne L. Gordon, Victoria, B. C.

In order to obtain more United States coal than is needed for emergencies, Canada must adopt restrictions to the use of coal similar to those in effect in the United States.

Coal Situation Serious in Canada

Without economy and co-operation, Canada's coal problem will soon reach an acute stage. Supplies, much below normal are being rapidly depleted, and their renewal from the United States is problematical. Since the coal strike so bituminous coal has been received in Canada from the south, and although the miners have been ordered to return to work, many are refusing to do so.

The bituminous coal production in the United States, and will be below normal for weeks, and perhaps months and although the United States authorities are anxious to meet Canada's coal requirements, they can do so only in proportion to production.

How serious the situation is can be seen from the coal imports this season in comparison to what were received in corresponding periods in previous years.

Soviet Ambassador Not Recognized in U.S.

Ludwig Merton, ambassador of the Soviet Union from the Russian soviet government was declared in contempt of the joint legislative committee which is investigating radical activities in New York state and a warrant for his arrest will be issued. Merton had been subpoenaed to appear before the committee at 10:30 a. m. Monday morning. He neither appeared nor sent the papers but instead declared in a letter to the committee that he would decline to recognize its authority on the ground that he was an ambassador from the soviet government. He said communications between himself and his government were private for the reason that he was a diplomatic representative.

Weather Improves Stock Situation

The present mild weather is greatly relieving the cattle situation in connection with feed, although, according to people who close touch with the matter, many parts of southern Alberta are by no means out of the wood yet in sections where feed was covered by snow, stockmen are once more becoming easy, and winter stocks are being hastily stacked.

It is particularly in connection with the movement of cars that the situation generally has improved considerably during the past few days. Every opportunity is being taken by the C. P. R. to rush supplies of feed where they are wanted, and the movement of cattle is also now in much better shape. On the Lethbridge division alone 82 stock cars were in readiness for loading Monday, and 72 cars in sight for Tuesday.

Australian Loan Is Not a Success

Peace loans are not so successfully raised in the Australian commonwealth as in Canada. Advice has been received by the department of trade and commerce that the twenty-five million pounds sterling loan for repatriation purposes which Australia raised during the autumn fell short of the required amount by five million pounds. An extension of fourteen days had to be given to afford subscribers a further opportunity to make up the full amount. In Australia, in the event of failure on the part of the public to support a loan, compulsory subscription is resorted to under legislative authority.

OUR AGRICULTURAL POSITION.
The Hon. S. F. Timmins, Canada's new minister of agriculture, has summed up the outstanding facts of Canada's agricultural position in an article appearing in the November number of the Agricultural Gazette. He presents statistics showing the growth of Canada's financial burden during the past five years and points out means by which our national debt will be reduced. He says in part: "I am confident that this Dominion, through the development of her natural resources, will in time wipe out her debt. Forestry, fisheries and mines contribute their part of the revenue but by far the greatest return will be derived from agriculture which industry we must continue to establish in permanency and increase in magnitude. One of the greatest responsibilities that falls on either the federal or provincial department of agriculture is the conservation of the great wealth that lies in the virgin soil. Innumerable considerations are involved in this one problem, but the whole effort can be accomplished if we engage in mixed farming with live stock as a basis. This is the fundamental principle underlying success in agriculture."

Vocational Training For Soldiers a Success

With a total of 20,348 ex-members of the Canadian expeditionary forces undergoing training in schools and universities, the vocational branch of the department of soldiers' civil re-education had this week established a record in industrial training. Of the 20,348 men, 10,794 are in schools operated by the vocational branch, while 9,554 are being re-trained in industrial training.

To date, 7,883 men have graduated from the course. The training is again issued that men eligible for vocational retraining must apply before February 1 next, after which date no application will be received from men now demobilized or discharged from treatment.

Party Government Finish in Ontario

The elimination of party government in Ontario of party government—this is the wish in the mind of Premier G. C. Drury, and no less a purpose will be to secure some of the activities of the party provincial government according to a statement by Premier Drury. Mr. Drury, when asked if the voters of Ontario at the next election would be called upon to vote for the proportional representation system, said: "I should say that it is altogether probable that at the next Ontario elections the present system will be superseded by the one you have mentioned. There is no more certainty now for this electoral reform in this province."

Heavy losses in livestock are reported from the northern part of Colorado because of the blizzard.

Why You Should Deal at Home!

Because by so doing you are helping to build up your own town. Every dollar you spend in your own town helps to build up your own Schools, Churches, Roads, Sidewalks, Sewers, Waterworks, etc. The money you send out of town helps to build up some other place, and increase the value of some other man's property instead of your own.

ITEMS OF LOCAL INTEREST

Ladies shoes—A very fine quality and style at The Hicks Trading Co.

The annual ratcatcher meeting will be held in the Empress theatre on Monday evening, Nov. 24th.

Remember the sacred bond concert the last Sunday evening in November.

The last one this year.

Bobt. McCourt, superintendent of "Harvest" ranch, north of here, is spending a few days in town this week renewing old acquaintances.

Mrs. Morris of Medicine Hat, is spending a few days in town visiting her parents, Mr. and Mrs. Wm. Gray.

The ladies old time exercise that they could not go to the dance because they had a dress, will not hold good next Friday. It's a hard time dance.

Keep in mind the afternoon tea on Monday, November 24th, under the auspices of the Altar Society.

At the Southern Alberta Teachers' Convention held in Medicine Hat last week, Mrs. Ed. L. Stone was elected first vice-president of the association.

Nominations for mayor, councillors and school trustees will be held in Crow's hall on Monday, Dec. 1st, between the hours of 10 and 17 noon.

Mrs. (Dr.) Shearer and daughter, Miss Jean, returned home last Thursday after spending the summer visiting friends in Ontario and Quebec.

Xmas cards for friends around the sea. Select them at Blundell's.

Stanley Brett met with a slight accident last Tuesday as a result of which he received a lacerated lip. He was hit with a piece of a broken glass bottle.

Messrs. Geo. Abbott and Don Stoner paid a visit last week end to Rev. H. C. B. Gibson and Miss Gibson at their current. Mr. and Miss Gibson are leaving shortly for England on a visit to their old home.

At the supreme court held in Medicine Hat last week, Carl Penstrom, an attorney, was sentenced to three months imprisonment for running down a pedestrian. This should be a warning to careless drivers.

The whist drive and social evening held in St. Ambrose parish hall last Monday evening was a great success. A large crowd was in attendance and a most enjoyable evening was spent.

The ladies of the whist drive and social evening were the winners of the first prize. Mrs. Hodge and Dr. Kerr carried off the consolation. After the whist, refreshments were served and evening was closed with a delightful dance.

In recognition of the long and faithful services of Rev. Andrew Henderson, of Kipling, Sask., the Presbyterian church of Saskatchewan conferred the degree of Doctor of Divinity upon him. This degree was conferred upon him at a special meeting of the Saskatchewan Presbyterian college during the session of the Synod in Regina. Dr. Henderson is a brother of Mr. Wm. Henderson, Br. of the town.

Man—Get your up-to-date outfit of clothing and furnishings at The Hicks Trading Co.

School is now being called at 9:30 instead of nine. This will be continued during the winter months.

The financial statement for the Redcliff Church District appears in this issue of the Review.

Try one of our made-to-measure suits. Splendid value at The Hicks Trading Co.

Xmas is near. Shop early, while the selection is good, at Blundell's, the store of the Christmas spirit.

TO LET—Six-roomed cottage in good condition. Apply to F. O. McLean, corner Fourth Avenue, Redcliff.

Mr. and Mrs. Charles Towers, of Jenner, are spending this week in town the guests of their daughter, Mrs. H. Moore.

The chicken early this week took away all the snow in a few hours and now there is not enough left to make a snow ball. We have a regular spring weather ever since.

Don't forget the hard time ones under the auspices of the Civic Improvement League, in Reid's Hall Friday evening of this week. A regular winter weather ever since.

The brick plants here are experiencing some difficulty securing cars to ship out brick. Owing to the run and fuel situation cars are being rushed to the mines and hay districts hence the shortage.

Owing to changes in the officers of the local G. W. V. A. the acknowledgment of a donation of \$25.00 from the Altar Society was overlooked. The officers now wish to acknowledge this donation with thanks.

School teachers of Medicine Hat have submitted to the school board their schedule of proposed new salaries passed by the Teachers' Association. The increase amounts to a total of \$28,000 a year.

The Ladies Aux. Society of the Presbyterian church held holding a sale of fancy work, plain sewing and home cooking on Tuesday, Dec. 2nd. Many articles suitable for Christmas presents will be on sale and afternoon tea will be served.

The Ladies Aux. Society of St. Ambrose church will hold their afternoon tea and annual sale of work on the afternoon of Tuesday, December 2nd. In the evening of the same day they will also be a dance. Watch for further particulars.

STAYED—Onto premises of undertaker, two heifer yearling calves. No brandy one white and a little red, one red and little white. Owner can get same by paying expenses. Norman Jackson, Bowell, Alberta.

Members of the Civic Improvement League are asked to meet at the home of Mrs. Lydell next Tuesday afternoon at three o'clock to help new crests on the Prince of Wales Pier won by the town for going over the top in the Vitreous Loan drive. All who are asked to be present on this occasion as the record made by Redcliff means considerable saving.

REVOLUTIONARY FORCES DEFEATED IN RUSSIA. Revolutionary forces, which for the last two days have attempted to secure control of Vladivostok, were completely defeated by the government troops in a battle which was commenced before dawn. Gen. Gaidar, the revolutionary leader, was wounded and captured and his followers were driven from every point of vantage by government troops.

Much Fruit Frozen

In British Columbia

Chief Dominion Fruit Inspector G. L. Clarke has returned from one Vancouver, where he went casually into the recent frost damage to fruit and potatoes. He estimates a loss of three hundred carloads of apples, the output of the first serious frost, when thousands of boxes of apples were taken on the trees. Since that time many of these have been picked and placed in storage, but it will not be known for some time just what proportion of these will be saved.

Mr. Clarke said that one-third of the potato crop is still in the ground, but while there has been heavy damage the crop will not be a total loss by any means.

No Provincial Politics

Says Crear to Farmers

Frank words for warning to farmers to keep out of provincial politics, at any rate, until the protective tariff is disposed of and other very important national reforms have been featured the address delivered by Hon. T. A. Crear at Brandon Tuesday night.

The warning was uttered after Crear had outlined the platform of the Canadian Council of Agriculture and spoken of it as a platform that was not an appeal to a class, but to Canadians as a whole whose best interests, he stated, it was well calculated to serve.

Touching upon proportional representation, which the platform also provides for, Crear said there was little doubt of the principle being applied in the three prairie provinces so far as larger cities were concerned at the next election.

King George is said to have given a promise that the Prince of Wales shall pay a formal visit to Montreal next year. It is understood that a round of festivities will be organized in his honor in Spain.

Canada's Coal Supply To Be Dealt Out

'Canada is advised by Washington that this country will be treated fairly, but as long as the present situation obtained by the recent strike in the bituminous coal fields remains acute, coal can go only to such utilities and essential industries in actual need. It is therefore urgent for Canada to look for coal from the United States under conditions which must be set out on that point.

Canadian Government Decides Naval Policy

Hon. C. C. Balfour, minister of naval service, when seen regarding the approaching visit of Admiral Lord Jellicoe, stated that as Lord Jellicoe so plainly expressed at Victoria his confidence in Canada is not to recommend to the government what Canada's permanent naval policy shall be, but only to give the Canadian government in an advisory capacity, the benefit of his experience and his knowledge of naval defence. It is the responsibility of the Canadian government to decide on the naval policy and this the minister stated will be done in the very near future, and then it will be submitted to parliament for approval at the next session of the house.
